

VMware Infrastructure Health Check Lite

Overview

You have made an investment to virtualize your computing environment; let an expert help ensure you are getting the most of your investment. Virtualization touches many aspects of your computing environment such as servers, networks and storage—as well as the organizations and processes that control them.

A VMware Certified Professional (VCP) consultant will work with your team to understand your unique environment and provide guidance on the current leading practices for configuring and managing VMware systems. Working together with your team, the VCP will review your VMware Infrastructure systems and provide concrete, actionable recommendations for opportunities for optimization related to configuration and usage that are identified.

This offering is designed specifically for those customers in Europe, Middle East and Africa, who have purchased the VMware Infrastructure Midsize Acceleration Kit for 6 processors (includes 30 Consulting & Training credits). VMware's global network of VMware Authorized Consultant (VAC) partners have experts in your area and employ VMware Certified Professionals (VCPs) who can provide this assistance.

Deliverables

- Conduct assessment of VMware virtual environment (up to 2 hosts) using VMware best practices
- **Identify potential areas to optimize configuration and usage**
- Present an interactive workshop to facilitate knowledge transfer on VMware best practices

Roles and Responsibilities

- **VMware Certified Professional Consultant**
Analyzes environment, conducts workshop, transfers knowledge of best practices and makes recommendations for optimal performance
- **Customer Systems Administrator**
Responsible for access to hardware, storage and networking
