

VMware Cloud Foundation Services and Lifecycle Support Overview

Get to cloud faster

At a glance

Get the help you need to quickly realize value from your VCF investment through a variety of services for any stage of your cloud journey.

Key benefits

- Get to private cloud faster with VCF experts
- Get your implementation right the first time with best practices and proven methodologies
- Integrate with your entire ecosystem
- Advance private cloud maturity
- Optimize technology investments
- Reduce risk and complexity
- Minimize disruption to existing operations
- Improve team skills

It's important to be agile and move as quickly as possible. So how do you overcome obstacles and maximize the value of your VMware Cloud Foundation® (VCF) investments? Leverage experts who know your industry and know the technology. They can help you achieve your goals faster than you can do it alone.

Services overview

Our experts can help you with consulting services, operational services, and training. We can architect, deploy, configure, integrate, and operationalize your VCF private cloud.

VMware Cloud Foundation Jumpstart Workshop

Jumpstart Workshop helps you get started on your journey to a full-stack VCF private cloud. This interactive workshop helps advance your private cloud initiatives and avoid common mistakes. The workshop can include:

- Evaluating of your current capabilities and analyzing cloud use cases to determine your cloud maturity.
- Analyzing your current architecture for alignment to VMware Validated Solutions and best practices. We identify gaps and provide recommendations for resolving them. Next we develop a conceptual architecture that aligns with your objectives.
- Developing a capabilities roadmap for cloud use cases with clear phases, milestones and backlog items.
- Creating a prioritized backlog of cloud capabilities and specific VMware Pro Cloud Services™ to implement your solution.

VMware Pro Cloud Services

Pro Cloud Services can help you achieve the benefits from your private cloud faster and with less risk. Our services provide consistent, predictable, and reliable solutions by using VMware Validated Solutions combined with our field proven best practices developed from our years of experience. We provide operational assistance for integrating with your existing and third-party solutions. We offer a range of services to support your IT initiatives.

Extended Expert Team Services

Extended Expert Team Services provide a flexible way to add experienced VCF consultants to your team for advancing your private cloud maturity. Our services provide you with expert guidance and task prioritization for accelerating project timelines. We help you address challenges you may be experiencing, bridge gaps where additional expertise and best practices would be valuable and empower your team through knowledge transfers.

Technical Adoption Manager

Technical Adoption Manager provides a designated resource (a “TAM”) with the subject matter expertise to assist your organization in optimizing your VCF private cloud. TAMs embed themselves in your team to help you advance adoption of VCF in support of your objectives.

Learning

With any new technology, knowledge gaps can exist. We offer a range of online training for VCF that can advance and augment your in-house skills. Leveraging these services not only gets your teams ready for the future, but it's also an investment in their personal growth.

Benefits

VCF Professional Services have the experience, best practices, proven methodologies, and deep knowledge of VMware technology that can help you reduce risk and complexity and minimize disruption. From developing your strategy and roadmap, to architecting, deploying, and integrating your environment, to implementing operations and management, we can help you realize your goals faster.
