List of Certified Cloud Providers

## VMware Cloud Foundation License Portability – List of Certified Cloud Providers

This page is the official list of Broadcom certified cloud service providers (VCSP or MaaS partners) offering either Infrastructure-as-a-Service offerings or integrated VCF offerings eligible for License Portability of VCF and applicable Add-ons. For integrated VCF offerings, reach out to your cloud service provider partner to verify region availability, and for more information please [contact your local salesperson](#).

NOTE: For non-VCSP or MaaS partners providing infrastructure-as-a-service offerings compatible with License Portability not listed on this page, refer to the [Broadcom Compatibility Guide](#) to verify that the underlying infrastructure of the endpoint is technically capable of running VCF.

**Infrastructure-as-a-Service Bare Metal Offerings**

With Infrastructure-as-a-Service offerings, there are no changes in relationships that customers maintain with Broadcom, including directly receiving technical support from Broadcom. Furthermore, customers can self-manage the VCF environment or contract with third parties to ensure that the management options meet the organizational requirements in performance and security.
